## A new angle on sweeping

The Angler Broom from O-Cedar has soft rubber bumpers to prevent scratches on the furniture. Its “memory bristles” retain their shape, and the wide angle reaches into corners and under cabinets. And those bristles are made from recycled plastic bottles — exactly what we’re talking about in our main story today. O-Cedar anticipates the brooms will use 60-million water bottles and use 200,000 fewer gallons of fuel in the manufacturing process. Talk about your green sweep! Suggested retail: \$5.99-\$8.99 at food, drug, hardware and mass merchants.
